## Pakistan independence day

# Bilateral ties show great potential

Farukh Amil AMBASSADOR OF PAKISTAN

Sixty-six ago on this day, Pakistan peared on the world map as an independent Muslim country ful and strenu-

ous struggle by the Muslims of the South Asian subcontinent for a homeland of their own under the inspiring leadership of Ouaid-e-Azam Muhammad Ali Jinnah. This year Pakistan achieved a watershed development in democracy for political maturity and stability. For the first time in the history of Pakistan there was a smooth transition from one democratically elected government to the next. This bodes well for national and regional prosperity.

On this auspicious occasion I express on the behalf of the government of Pakistan, on my own behalf and on behalf of my com-

framework of human dignity.

The new government led by Prime Minister Muhammad Nawaz Sharif with businessfriendly policies will provide further strength to bilateral relations. Our focus includes deepening understanding between our coming generations.

At present 69 Japanese companies are involved in numerous businesses in Pakistan. Apart from a strong presence in the automobile sector, Japanese companies are actively involved

in other areas such as construction, health and education. Bank of Japan-Mitsubishi has celebrated its 60th year of business in Pakistan. JICA (Japan International Cooperation Agency) has played an invaluable role in the social sector and building critical infrastructure such as the Pakistan-Japan Friendship Tunnel in Kohat. The Japan External Trade Organization's role for its consistent and determined efforts to promote trade and investment between the two countries

is laudable. Many other megaprojects are in the pipeline, the most prominent being the Karachi Circular Railway (KCR) and power transmission lines project connecting Thar-Power Plant with the national grid and the construction of the state-ofthe-art Thar-Coal Power Plant. Owing to the increasing en-

ergy needs of a growing society, Pakistan is now exploring new alternatives. Pakistan is blessed with huge potential in energy resources like coal, solar and wind. It would be ideal to tap these with cutting edge technologies of Japan. Proximity to huge regional markets, including the Middle East and Central Asia, puts Pakistan with its youthful, energetic population at a superb crossroads for investment and growth. Pakistan presents many opportunities given its own large consumer market.

Pakistan is also a non-permanent member of the U.N. Security Council where it has played a vital role, in harmony with the international community, in dealing effectively with challenges facing the world.

Pakistan remains fully committed to international peace and regional stability. As a responsible member of the international community, Pakistan has deputed men and women from its military and police forces as U.N. peacekeepers in the world's most difficult conditions and places. Many have sacrificed their lives

in their effort to maintain peace. Pakistan and Japan have shared roots since ancient times from Gandhara to Nara. In modern history we are two friendly countries whose potential, through sharing of expertise and resources, can build an even stronger bond in the 21st

## Important step taken in democratic process

Seishiro Eto PRESIDENT, JAPAN-PAKISTAN PARLIAMENTARIANS' FRIENDSHIP LEAGUE, FORMER VICE SPEAKER, **HOUSE OF REPRESENTATIVES** 

On the occasion of the 66th anniversary of Pakistan's independence, I would like to offer my heartfelt congratulations to all the people of

the Islamic Republic of Pakistan on behalf of the Japan-Pakistan Parliamentarians' Friendship

This year is a very special year for Pakistan. For the first time in its history, Pakistan's civilian government completed a full five-year term and held a general election in May. As a result of the election, there was a transfer of power between the civilian governments, and a new government led by H.E. Nawaz Sharif came to power. I have heard that many women and young people went to the polling station. Many people in Pakistan must have had the strong will to cast their votes. Demonstrating public will through elections is the first step toward the consolidation of democracy. In this regard, I profoundly welcome Pakistan for taking this very significant

first step. I also would like to extend my sincere welcome to the election of the next president last month. Through the general election and the presidential election, Pakistan has launched a brandnew administration. Although there still remain issues to be tackled, I have a strong expectation for the high potential that Pakistan possesses.

Pakistan's land area is twice as big as Japan's. It has a population of 180 million, most of whom are of the promising,

young generation. Pakistan is one of the countries of the "Next Eleven." It enjoys various kinds of agricultural products throughout the four seasons. It is famous for active cotton industries. Pakistan is rich in culture with the remains of the Indus Valley civilization designated as a World Heritage site. It is very important for Pakistan, with such huge potential, to be stabilized and achieve its development, not only for Pakistan herself but also for the region and the international society.

Since the founding of Pakistan 66 years ago, all the Pakistani people have been devoting themselves to building a nation by overcoming differences of the people as well as by gathering their knowledge and strength. I welcome the fact that the wishes for peace and prosperity, which have been passed on from the time of the founding of the nation, have been realized thanks to the tremendous efforts of Pakistan to date.

Since the establishment of diplomatic relations in 1952, Japan and Pakistan have established friendly and cooperative relations enjoying exchanges at various levels. The relations have been developed not only between the two governments but also through activities of the business community and academic interactions. I hope the two countries will continue to build mutually cooperative

I am determined, as president of the Japan-Pakistan Parliamentarians' Friendship League, to exert all my efforts toward further fostering mutual understanding and friendship between Japan and Pakistan.

Allow me to reiterate my congratulations on the occasion of the Independence Day of Pakistan and to wish for the further prosperity of Pakistan.

#### Japan remains strong, reliable development partner of Pakistan Pakistan greatly values its rela-

tions with Japan and considers it as a strong and reliable development partner of the country. Pakistan is always looking forward to Japan's long-term engagement in its development and to search for ways and means to further strengthen the trade and economic interaction between our two friendly countries.

Pakistan is a country that has the space, the energy of a youthful population and a growing domestic market, centrally located in a region with increasing business opportunities and demand, and blessed by nature.

Pakistan offers great growth opportunities. According to The Economist, in terms of stock exchanges of the world, virtually everywhere is beaten hands down by the Karachi Stock Exchange (KSE), which has risen by 40 percent so far this year in local currency terms. The KSE "sizzled" last year, too, posting a gain of 49 percent. The rewards of doing business in Pakistan can be gauged by the success of the IT/telecommunication industry which was empowered to invest and reap profits. Hence, Pakistan as a "Next Eleven" country, with immense productivity potential, can generate substantial opportunities for growth for investors, particularly those with saturated demand in their domestic economies.

Pakistan greatly appreciates the genuine development assistance provided by Japan, over six decades of support with sincerity. We would always remember Japanese assistance during the 2005 earthquake, the flood relief efforts in 2010, Pakistan Development Forum (PDF 2010) assistance enabling the nation to overcome the economic challenges and regain its macroeconomic stability and the assistance provided in eradicating the menace of polio from the country. Japan's role as a founding member of the Friends of Democratic Pakistan forum is laudable. Japan's official development assistance (ODA) designed for the people of Pakistan for prosperity is rendered with respect and dignity.

Japan's assistance in the Kohat Friendship Tunnel, construction of highways, irrigation projects, expansion in electricity networks and a number of social sector projects is strong evidence of this relationship. Japan is a trusted partner since as far back as 1925 when the Bank of Tokyo-Mitsubishi's predecessor had a branch in Karachi. Many Japanese companies, like Yamaha, Suzuki, YKK, Sumitomo Corp., Toyota and Honda, have been operating successfully for decades in Pakistan. However, a huge potential exists between the two countries to further develop investment ties. Pakistan looks forward to the important Japanese role in critical infrastructure development projects, such as the Karachi Circular Railway (KCR) project and establishment of the Japan Special Economic Zone (JSEZ). If we compare the statistics it would lead us to conclude that bilateral **CONTINUED ON PAGE 7**

# Pakistan independence day

#### Investment opportunities create high hope for business relations

Teruo Asada CHAIRMAN, JAPAN-PAKISTAN BUSINESS COOPERATION COMMITTEE

On behalf of the Japan-Pakistan Business Cooperation Committee, I would like to extend my sincere and heartfelt gratulations to

the people of the Islamic Republic of Pakistan on the occasion of Pakistan's Independence Day.

We welcome the fact that this year, for the first time in Pakistan's political history, one democratically elected government was succeeded by another, with the PML-N, led by Prime Minister Nawaz Sharif, following the former PPP administration.

It is well known that Nawaz Sharif, who has been elected prime minister for the third time, has a strong understanding of the business world. We have high hopes that, under his guidance, Pakistan will become more business-friendly, maintaining a beneficial investment environment and achieving improvements in economic infrastructure. We also expect that Pakistan's economy will be more active in attracting a larger number of foreign enterprises.

As the chairman of the Japan-

Committee, it is my firm belief that the two countries will be able to further strengthen existing trade ties. I am also sure that there are numerous investment opportunities for Japanese enterprises in various sectors of Pakistan's economy, from manufacturing and infrastructure projects to agriculture, energy and beyond.

Pakistan possesses tremendous strength with its population of 180 million — the sixth most populous in the world. This fact is of deep interest for Japanese companies, which see Pakistan as a highly promising future consumer market. As one example, leading Japanese automobile companies have been manufacturing cars and trucks in Pakistan, and gradually expanding their operations. This continues to contribute to economic development, and offers job opportunities and personal training to the people of Pakistan. Moreover, Pakistan's ideal geographic location also makes it a competitive and attractive choice for Japanese companies seeking to reduce production costs and to export finished goods to neighboring areas, such as the Middle East, Africa, and the Central Asian republics.

Further efforts by Japanese companies to make use of the strengths offered by Pakistan will contribute to the development of Pakistan Business Cooperation the economies of both nations.

### Generating investor confidence

#### **CONTINUED FROM PAGE 6**

trade and economic cooperation is far below the existing potential.

To exploit the untapped potential existing in Pakistan, the recent smooth democratic transition of the government in Pakistan among other things has generated business confidence and created an investment-friendly environment. The new government has enacted policies to take all business and investment enterprises on board to make

them partners in progress and prosperity. Over the last three decades, the country has moved in the direction of creating an increasingly larger space for the private sector and establishing a regulatory framework for private investment in important sectors.

This article is an edited extract of a text by Dr. Talat Imtiaz and Shazad Ahmad, provided by the Embassy of Pakistan in Japan.
